

# Push Sports Thumb Brace

Stabilizes skier's thumb, optimizes function

The **Push Sports Thumb Brace** protects skier's thumb and other MP (metacarpophalangeal) joint injuries, allowing athletes to continue playing.

- Non-elastic strap stabilizes MP joint while also providing secure, adjustable limitation of movement.
- Contoured padded shell enhances MP joint stability and protects thumb during contact.
- Minimal material on the palm optimizes hand function during sporting activities.
- Low-profile design is easily worn under a glove.
- Brace can be applied with one hand.

## Fitting: *The Secret is in the Strapping!*

**IMPORTANT:** This brace will not work if applied incorrectly! Please make sure you read the illustrated "how to" insert that comes with the Push Sports Thumb Brace. You can find an additional copy on our website at [http://bit.ly/Sports\\_Thumb](http://bit.ly/Sports_Thumb).

## Indications

- Ligament injury to the thumb MP joint (skier's thumb, RCL injury or gamekeeper's thumb)
- Sprain/strain of the thumb
- Thumb instability

## Sizing

The Push Sports Thumb Brace is available in 3 sizes, for Right or Left hands. To determine the correct size, measure around the middle of the hand, below the knuckles.

## Insurance Information

- The Push Sports Thumb Brace has an assigned L-code of L-3924.
- BraceLab is not a provider. We do not file insurance nor can we provide information on insurance coverage or reimbursement rates. Please contact your insurance for filing information.
